MIMS現象数理カフェセミナー

日時：2017年10月26日（木）（12:40 〜 13:20）

場所：中野キャンパス8階　談話室

Charm of Statistical Modeling

Yoko Tanokura (MIMS, Meiji Univ.)

Abstract: With the advent of big data, statistics and data science for modeling data are becoming important. In this seminar, we will briefly explain statistical modeling that describes the fluctuation structure of phenomena based on observation data. Taking examples of familiar phenomena such as consumer prices and stock prices, we will introduce the charm of statistical modeling.
